

Ivy Homes Property API — Reference

Version 1.4 · Base URL: <https://solve.ivy.homes>

⚠ **Read this first.** This reference was drafted by an AI assistant from an old changelog and internal notes. It was never reviewed against the running service. Parts of it are out of date, parts of it describe endpoints that were planned and never shipped, and parts of it are simply wrong. **The running API is the only source of truth.** Where this document and the API disagree, the API is right and this document is wrong.

Authentication

Two things identify a request.

1. Your API key

Every request must carry the API key you were issued. Append it as a query parameter:

```
GET /v1/listings?api_key=IVY26-XXXXXXXXXXXX
```

Your key is scoped to a single city. All endpoints are filtered to that city

automatically; there is no city parameter.

2. A user session

Your frontend must log an end user in.

POST /auth/login

```
{ "email": "demo1@ivy.homes", "password": "<your key password>" }
```

Response 200

```
{  
  "token": "eyJhbGciOi...",  
  "token_type": "Bearer",  
  "expires_in": 86400,  
  "user": { "email": "demo1@ivy.homes", "name": "Demo User" }  
}
```

Send the token on subsequent requests:

```
Authorization: Bearer <token>
```

Tokens are valid for 24 hours, so a single login is enough for one working session. There is no refresh flow.

POST /auth/logout

Invalidates the current token server side.

Three demo accounts exist: demo1@ivy.homes, demo2@ivy.homes, demo3@ivy.homes. They share the password issued with your key.

Conventions

Thing	Convention
Money	Indian rupees, integer, everywhere in the API
Area	Square feet, integer, everywhere in the API
Timestamps	ISO 8601, UTC, Z suffix, everywhere in the API
Dates	ISO 8601 YYYY-MM-DD
Strings	Lowercase for locality , furnishing , property_type , project_status

Pagination

Every collection endpoint takes page and **limit**.

Parameter	Type	Default	Notes
page	int	1	1-indexed
limit	int	20	Maximum 200

Collection responses are shaped:

```
{
  "total": 1240,
  "page": 1,
  "page_size": 20,
  "results": [ ... ]
}
```

total is the exact number of records matching your filters. To fetch every record, read **total**, divide by your **limit**, and request that many pages.

Listings

GET /v1/listings

Returns **active** sale listings in your city. Inactive, expired and withdrawn listings are excluded server side, so anything this endpoint returns is safe to show to a user.

Every **listing_id** is globally unique, and each listing corresponds to exactly one physical property.

Query parameters

Parameter	Type	Notes
page, limit	int	See Pagination
locality	string	Exact match, lowercase
bhk	int	Number of bedrooms
property_type	string	apartment, villa , independent house, plot, builder floor
min_price	int	Rupees, inclusive
max_price	int	Rupees, inclusive
furnishing	string	unfurnished, semi-furnished, fully-furnished
sort_by	string	price, carpet_area, posted_at, bedroom
order	string	asc (default) or desc

Example

```
GET
/v1/listings?locality=koramangala&bhk=3&min_price=15000000&order=desc&sort_by=price
```

Listing object

```
{
  "listing_id": "100-1000042",
  "listing_url": "https://www.100acres.com/property/1000042",
  "website": "100acres",
  "city_id": 1,
```

```
"apartment_name": "Prestige Lakeside Habitat",
"locality": "whitefield",
"property_type": "apartment",
"bedroom": 3,
"bathroom": 3,
"balcony": 2,
"floor": 7,
"total_floors": 18,
"furnishing": "semi-furnished",
"facing_direction": "north-east",
"covered_parking": 1,
"price": 14500000,
"carpet_area": 1240,
"super_built_up_area": 1620,
"latitude": 12.97161,
"longitude": 77.59461,
"posted_by": "agent",
"posted_by_name": "Rahul Sharma",
"posted_by_contact": "+912001234567",
"project_id": "P10001",
"description": "Corner 3 BHK apartment in Prestige Lakeside Habitat,
Whitefield. Semi-furnished, north-east-facing.",
"posted_at": "2026-06-14T09:20:00Z",
"is_verified": true
}
```

`posted_by_contact` is the seller's verified contact number. `description` is the seller's own text, shown as written.

`is_verified` means our operations team has checked the listing. `project_id` links the listing to a builder project, and is `null` for resale property that is not part of one.

GET /v1/listing/{listing_id}

A single listing. Same object as above.

GET /v1/listings/{listing_id}/similar

Up to ten comparable listings — same locality, same bedroom count, price within 15%. Useful for a “you may also like” strip on the detail page.

Rentals

GET /v1/rentals

Rental listings in your city. Supports page, **limit**, **locality**, bhk, furnishing, sort_by, order.

```
{
  "listing_id": "R1000042",
  "listing_url": "https://www.zerobroker.com/rent/1000042",
  "website": "zerobroker",
  "city_id": 1,
  "title": "2 BHK for rent in Koramangala",
  "apartment_name": "Sobha Meadows",
  "locality": "koramangala",
```

```
"property_type": "apartment",  
"bedroom": 2,  
"bathroom": 2,  
"floor": 4,  
"total_floors": 12,  
"furnishing": "fully-furnished",  
"facing_direction": "east",  
"price": 42000,  
"deposit": 250000,  
"maintenance": 2500,  
"carpet_area": 980,  
"super_builtup_area": 1280,  
"latitude": 12.93461,  
"longitude": 77.62281,  
"posted_by": "owner",  
"posted_by_name": "Priya Nair",  
"posted_by_contact": "+912009876543",  
"description": "2 BHK, fully-furnished, in Sobha Meadows, Koramangala.  
Close to the metro.",  
"posted_at": "2026-07-02T11:45:00Z"  
}
```

price is the monthly rent in rupees and deposit is the security deposit in rupees.

GET /v1/rentals/{listing_id}

A single rental.

Projects

GET /v1/projects

Builder projects in your city. Supports page, **limit**, **locality**, **project_status**, **sort_by** (price_min, price_max, launch_date, total_units), **order**.

```
{
  "project_id": "P10001",
  "project_url": "https://www.ivy.homes/projects/10001",
  "city_id": 1,
  "apartment_name": "Brigade Serenity",
  "developer_name": "Brigade",
  "locality": "sarjapur road",
  "project_status": "under construction",
  "total_units": 840,
  "total_towers": 6,
  "total_floors": 22,
  "launch_date": "2024-03-11",
  "possession_date": "2028-09-30",
  "rera_number": "PRM/KA/RERA/1251/446",
  "min_area_sqft": 980,
  "max_area_sqft": 2340,
  "total_listings": 37,
  "price_min": 8900000,
  "price_max": 21400000,
  "amenities": ["gym", "pool", "clubhouse", "park"],
  "latitude": 12.90121,
```

```
"longitude": 77.68442
}
```

`price_min` and `price_max` are in rupees.

`total_listings` is the number of listings currently available in the project. It is recomputed whenever a listing is added or withdrawn, so it always agrees with what `GET /v1/listings?project_id=...` returns.

`GET /v1/projects/{project_id}`

A single project.

Favourites

A logged-in user can save listings.

`GET /v1/favourites`

```
{ "count": 3, "results": [ /* listing objects */ ] }
```

`POST /v1/favourites`

```
{ "id": "100-1000042" }
```

DELETE /v1/favourites/{id}

Analytics

GET /v1/analytics/summary

Pre-computed aggregates for your city — handy for a dashboard screen.

```
{
  "city": "bangalore",
  "total_listings": 1240,
  "median_price": 11200000,
  "median_price_per_sqft": 8100,
  "by_locality": [
    { "locality": "whitefield", "count": 184, "median_price": 9800000 }
  ],
  "by_bhk": [ { "bedroom": 3, "count": 502 } ]
}
```

Errors

Status	Meaning
400	Bad parameter
401	Missing or invalid credentials
403	Credentials belong to a different key
404	No such record
422	Request body failed validation
429	Rate limit exceeded

Error bodies are `{"detail": "..."}`. **Read them.** They are written to be useful.

Rate limit: 1200 requests per minute per API key. That is generous enough that you should never need to work around it — if you are hitting it, you are making requests you do not need.

Health

GET `/health`

Unauthenticated. Returns service status and the server clock.
